September 2021

Labworks International is a leading supplier of specialty environments, including Controlled Environment Rooms and ISO Certified Cleanrooms. We are Canadian-based, with our head office in Vaughan, ON, a sales office in South-West Florida, and a manufacturing facility in Barrie, ON. We are a leading provider in Canada and the US and have continued requirements for high-quality candidates who want to grow their careers in a fast-paced and exciting environment.

Job Posting: Labworks International – HVACR Mechanical Engineer.

Position: Salaried – Fulltime

Labworks International is seeking a Mechanical Engineer to join its team of exceptional engineers and project managers. Qualified candidates are in the fields of mechanical, electrical, or related disciplines of engineering with a background in HVAC, Refrigeration, and Construction. Experience with construction in Hospitals, Pharmaceutical Companies, and Higher Education is an asset.

The ideal candidate would have a university-level engineering degree and have (or be in the process of) obtaining their P.Eng License. In addition, the successful candidate must have strong Revit and AutoCAD skills in the HVAC and/or refrigeration field. The role requires hands-on work through the design, construction, and commissioning of projects. Candidates must have a valid driver's license, have a vehicle in good repair during work hours, and have the ability to travel from time to time. Proficiency in French would also be a benefit.

JOB DESCRIPTION FOR PROJECT ENGINEER

- Obtain all required Health & Safety training for this position.
- Primary customer interface on assigned projects.
- Project Engineering – sizing, design, and drawing production for projects.
- Maintain a high degree of accuracy and professionalism.
- Project Management – ordering technical equipment, coordinating shop drawings and transmittals to clients, create building material lists for projects, coordinate trade contractors on-site, maintain project documentation
- Be extremely organized and communicate effectively with customers, peers, and reporting managers.
- Adhere to Labworks Engineering and Project Management quality systems
- Design and drawings in REVIT – ensure updating to stay current to requirements.
- Assist with the development of research-based projects – maintaining all records for review by grant providers.

- Commissioning, training, and documentation of projects
- Sales assistance on new opportunities.
- Organize suppliers
- Obtain additional training as required to meet job objectives
- Strong and effective communication in English is a must
- Other duties as assigned

Labworks offers a competitive compensation structure including salary, annual bonus, full health benefits package, and mileage reimbursement car plan. In addition, we firmly believe that investing in our staff provides the greatest value for our customers. We encourage our team to continually update through professional and technical development courses funded by Labworks.

Please forward your resume and any other supporting information, in confidence, to:
